Letter of recommendation

Confirming that the Comet Fuel Saving System by Comet Consulting Group d.o.o. from Belgrade during the pilot project installed on the vehicle of JKP Gradska čistoća Belgrade.

The Comet Fuel Saving System is installed on the DAF LF 250 FA and in a period of three months of testing the performance of this system has shown itself well and fuel consumption has been reduced by 10%.

We appreciate the environmental performance of the Comet Fuel Saving System, in order to reduce fuel consumption, smoke and harmful gases emission.
